Appendix B – Sample Intellectual Property Declaration

B.1 Statement by the Algorithm Submitter¹

Gang Tang, 910, Lei Jun Building, No.299 Bayi Road, Wuchang District, Wuhan City, Hubei Province, PR China, 430072, based on my understanding of the algorithm TRINE and its implementations (including reference implementation and optimized implementation) submitted by me, hereby solemnly declare:

1. I undertake that the algorithm and its implementations submitted by me meet the security requirements, including but not limited to: the algorithm does not contain any artificial backdoors or defects, and the implementations do not contain any malicious code. To the best of my knowledge, I undertake that the submitted algorithm and its implementations do not contain any data, information, or technology that infringes trade secrets or should be kept confidential under Chinese laws or other national laws.

2. I acknowledge and agree that the submitted algorithm and its implementations will be made public and will be subject to evaluation analysis and public review. The algorithm solicitors, public reviewers, and other relevant parties may use the algorithm and its implementations free of charge for the purpose of algorithm evaluation. I understand that the algorithm solicitors will select certain algorithms to advance to the next round of evaluation or to become winning algorithms based on evaluation analysis and comprehensive considerations, and that the algorithm submitted by me may not be selected for the next round or become a winning algorithm. I understand that no economic compensation or other compensation will be provided by the algorithm solicitors for the submitted algorithm.

3. I acknowledge and agree that, to facilitate the subsequent standardization of the new generation commercial cryptography algorithms, if the algorithm submitted by me is selected as a winning algorithm, the algorithm solicitors have the right to modify the submitted algorithm and its implementations for security, usability, or other considerations. I undertake that if the algorithm submitted by me is selected as a winning algorithm and standardized, I will impose no restrictions on the worldwide public availability and free use of the algorithm and its implementations.

4. The submitted algorithm and its implementations are original achievements of myself or my team. The implementation code of the algorithm submitted by me ☐ is / ☐ is not based on third-party code or code libraries requiring authorization. Except for properly marked, cited, and acknowledged content, all opinions, text, charts, data, etc., in the submission materials are original research results of myself or my team and do not include any published research results of others.

5. (Please choose one of the following two scenarios.)

☒ I do not hold and have no intention to hold any patents or patent applications related to the submitted algorithm and its implementations, and to the best of my knowledge, no patents or patent applications may cover the submitted algorithm and its implementations.

☐ The following patents and patent applications may cover the submitted algorithm and its implementations. For patents and patent applications held by me, I ☐ have / ☐ have not submitted all intellectual property statements; for patents and patent applications not held by me, I ☐ have / ☐ have not submitted intellectual property statements of all patents and patent applicants.

Table of Patents and Patent Applications

No.	Patent No. / Patent Application No.	Patent Name / Patent Application Name	List of Patentees / Patent Applicants	Intellectual property statement submitted by each patentee/patent applicant?
				☐ Yes ☐ No

				☐ Yes ☐ No
--	--	--	--	--

Note: To be filled in by the algorithm submitter according to the actual situation.

I solemnly declare that, to the best of my knowledge, I have disclosed all patents and patent applications related to the submitted algorithm and its implementations. I undertake that, to the best of my knowledge, the submitted algorithm and its implementations comply with the laws and regulations of China and other countries and do not infringe upon any third-party legal rights. In the event of any infringement dispute or other violation of laws or regulations, I undertake that the algorithm submitter shall be responsible for handling, eliminating the impact, and bearing the corresponding legal liability. I fully understand that the legal consequences of this declaration shall be borne by myself.

Signature:

Date: 2026.04.23

(Note: If there are multiple algorithm submitters, each algorithm submitter shall sign this document separately.)

B.1 Statement by the Algorithm Submitter²

Debiao He, 720, Lei Jun Building, No.299 Bayi Road, Wuchang District, Wuhan City, Hubei Province, PR China, 430072, based on my understanding of the algorithm TRINE and its implementations (including reference implementation and optimized implementation) submitted by me, hereby solemnly declare:

1. I undertake that the algorithm and its implementations submitted by me meet the security requirements, including but not limited to: the algorithm does not contain any artificial backdoors or defects, and the implementations do not contain any malicious code. To the best of my knowledge, I undertake that the submitted algorithm and its implementations do not contain any data, information, or technology that infringes trade secrets or should be kept confidential under Chinese laws or other national laws.

2. I acknowledge and agree that the submitted algorithm and its implementations will be made public and will be subject to evaluation analysis and public review. The algorithm solicitors, public reviewers, and other relevant parties may use the algorithm and its implementations free of charge for the purpose of algorithm evaluation. I understand that the algorithm solicitors will select certain algorithms to advance to the next round of evaluation or to become winning algorithms based on evaluation analysis and comprehensive considerations, and that the algorithm submitted by me may not be selected for the next round or become a winning algorithm. I understand that no economic compensation or other compensation will be provided by the algorithm solicitors for the submitted algorithm.

3. I acknowledge and agree that, to facilitate the subsequent standardization of the new generation commercial cryptography algorithms, if the algorithm submitted by me is selected as a winning algorithm, the algorithm solicitors have the right to modify the submitted algorithm and its implementations for security, usability, or other considerations. I undertake that if the algorithm submitted by me is selected as a winning algorithm and standardized, I will impose no restrictions on the worldwide public availability and free use of the algorithm and its implementations.

4. The submitted algorithm and its implementations are original achievements of myself or my team. The implementation code of the algorithm submitted by me ☐ is / ☐ is not based on third-party code or code libraries requiring authorization. Except for properly marked, cited, and acknowledged content, all opinions, text, charts, data, etc., in the submission materials are original research results of myself or my team and do not include any published research results of others.

5. (Please choose one of the following two scenarios.)

☒ I do not hold and have no intention to hold any patents or patent applications related to the submitted algorithm and its implementations, and to the best of my knowledge, no patents or patent applications may cover the submitted algorithm and its implementations.

☐ The following patents and patent applications may cover the submitted algorithm and its implementations. For patents and patent applications held by me, I ☐ have / ☐ have not submitted all intellectual property statements; for patents and patent applications not held by me, I ☐ have / ☐ have not submitted intellectual property statements of all patents and patent applicants.

Table of Patents and Patent Applications

B.1 Statement by the Algorithm Submitter³

Yu Dai, Room 418, School of Mathematics and Statistics, No. 122 Luoshi Road, Wuhan City, Hubei Province, based on my understanding of the algorithm TRINE and its implementations (including reference implementation and optimized implementation) submitted by me, hereby solemnly declare:

1. I undertake that the algorithm and its implementations submitted by me meet the security requirements, including but not limited to: the algorithm does not contain any artificial backdoors or defects, and the implementations do not contain any malicious code. To the best of my knowledge, I undertake that the submitted algorithm and its implementations do not contain any data, information, or technology that infringes trade secrets or should be kept confidential under Chinese laws or other national laws.

2. I acknowledge and agree that the submitted algorithm and its implementations will be made public and will be subject to evaluation analysis and public review. The algorithm solicitors, public reviewers, and other relevant parties may use the algorithm and its implementations free of charge for the purpose of algorithm evaluation. I understand that the algorithm solicitors will select certain algorithms to advance to the next round of evaluation or to become winning algorithms based on evaluation analysis and comprehensive considerations, and that the algorithm submitted by me may not be selected for the next round or become a winning algorithm. I understand that no economic compensation or other compensation will be provided by the algorithm solicitors for the submitted algorithm.

3. I acknowledge and agree that, to facilitate the subsequent standardization of the new generation commercial cryptography algorithms, if the algorithm submitted by me is selected as a winning algorithm, the algorithm solicitors have the right to modify the submitted algorithm and its implementations for security, usability, or other considerations. I undertake that if the algorithm submitted by me is selected as a winning algorithm and standardized, I will impose no restrictions on the worldwide public availability and free use of the algorithm and its implementations.

4. The submitted algorithm and its implementations are original achievements of myself or my team. The implementation code of the algorithm submitted by me ☐ is / ☐ is not based on third-party code or code libraries requiring authorization. Except for properly marked, cited, and acknowledged content, all opinions, text, charts, data, etc., in the submission materials are original research results of myself or my team and do not include any published research results of others.

5. (Please choose one of the following two scenarios.)

I do not hold and have no intention to hold any patents or patent applications related to the submitted algorithm and its implementations, and to the best of my knowledge, no patents or patent applications may cover the submitted algorithm and its implementations.

☐ The following patents and patent applications may cover the submitted algorithm and its implementations. For patents and patent applications held by me, I ☐ have / ☐ have not submitted all intellectual property statements; for patents and patent applications not held by me, I ☐ have / ☐ have not submitted intellectual property statements of all patents and patent applicants.

Table of Patents and Patent Applications

No.	Patent No. / Patent Application No.	Patent Name / Patent Application Name	List of Patentees / Patent Applicants	Intellectual property statement submitted by each patentee/patent applicant?
				☐ Yes ☐ No
				☐ Yes ☐ No

Note: To be filled in by the algorithm submitter according to the actual situation.

I solemnly declare that, to the best of my knowledge, I have disclosed all patents and patent applications related to the submitted algorithm and its implementations. I undertake that, to the best of my knowledge, the

submitted algorithm and its implementations comply with the laws and regulations of China and other countries and do not infringe upon any third-party legal rights. In the event of any infringement dispute or other violation of laws or regulations, I undertake that the algorithm submitter shall be responsible for handling, eliminating the impact, and bearing the corresponding legal liability. I fully understand that the legal consequences of this declaration shall be borne by myself.

3. I acknowledge and agree that, to facilitate the subsequent standardization of the new generation commercial cryptography algorithms, if the algorithm submitted by me is selected as a winning algorithm, the algorithm solicitors have the right to modify the submitted algorithm and its implementations for security, usability, or other considerations. I undertake that if the algorithm submitted by me is selected as a winning algorithm and standardized, I will impose no restrictions on the worldwide public availability and free use of the algorithm and its implementations.

4. The submitted algorithm and its implementations are original achievements of myself or my team. The implementation code of the algorithm submitted by me ☐ is / ☐ is not based on third-party code or code libraries requiring authorization. Except for properly marked, cited, and acknowledged content, all opinions, text, charts, data, etc., in the submission materials are original research results of myself or my team and do not include any published research results of others.

5. (Please choose one of the following two scenarios.)

☒ I do not hold and have no intention to hold any patents or patent applications related to the submitted algorithm and its implementations, and to the best of my knowledge, no patents or patent applications may cover the submitted algorithm and its implementations.

☐ The following patents and patent applications may cover the submitted algorithm and its implementations. For patents and patent applications held by me, I ☐ have / ☐ have not submitted all intellectual property statements; for patents and patent applications not held by me, I ☐ have / ☐ have not submitted intellectual property statements of all patents and patent applicants.

Table of Patents and Patent Applications

No.	Patent No. / Patent Application No.	Patent Name / Patent Application Name	List of Patentees / Patent Applicants	Intellectual property statement submitted by each patentee/patent applicant?
				☐ Yes ☐ No
				☐ Yes ☐ No

Note: To be filled in by the algorithm submitter according to the actual situation.

I solemnly declare that, to the best of my knowledge, I have disclosed all patents and patent applications related to the submitted algorithm and its implementations. I undertake that, to the best of my knowledge, the submitted algorithm and its implementations comply with the laws and regulations of China and other countries

and do not infringe upon any third-party legal rights. In the event of any infringement dispute or other violation of laws or regulations, I undertake that the algorithm submitter shall be responsible for handling, eliminating the impact, and bearing the corresponding legal liability. I fully understand that the legal consequences of this declaration shall be borne by myself.

B.1 Statement by the Algorithm Submitter⁹

Runqing Xu, Xinja Building, National Cybersecurity Center for education and innovation, No. 13 Jinghe Road, Dongxihu District, Wuhan City, Hubei Province, based on my understanding of the algorithm TRINE and its implementations (including reference implementation and optimized implementation) submitted by me, hereby solemnly declare:

1. I undertake that the algorithm and its implementations submitted by me meet the security requirements, including but not limited to: the algorithm does not contain any artificial backdoors or defects, and the implementations do not contain any malicious code. To the best of my knowledge, I undertake that the submitted algorithm and its implementations do not contain any data, information, or technology that infringes trade secrets or should be kept confidential under Chinese laws or other national laws.

2. I acknowledge and agree that the submitted algorithm and its implementations will be made public and will be subject to evaluation analysis and public review. The algorithm solicitors, public reviewers, and other relevant parties may use the algorithm and its implementations free of charge for the purpose of algorithm evaluation. I understand that the algorithm solicitors will select certain algorithms to advance to the next round of evaluation or to become winning algorithms based on evaluation analysis and comprehensive considerations, and that the algorithm submitted by me may not be selected for the next round or become a winning algorithm. I understand that no economic compensation or other compensation will be provided by the algorithm solicitors for the submitted algorithm.

3. I acknowledge and agree that, to facilitate the subsequent standardization of the new generation commercial cryptography algorithms, if the algorithm submitted by me is selected as a winning algorithm, the algorithm solicitors have the right to modify the submitted algorithm and its implementations for security, usability, or other considerations. I undertake that if the algorithm submitted by me is selected as a winning algorithm and standardized, I will impose no restrictions on the worldwide public availability and free use of the algorithm and its implementations.

4. The submitted algorithm and its implementations are original achievements of myself or my team. The implementation code of the algorithm submitted by me ☐ is / ☐ is not based on third-party code or code libraries requiring authorization. Except for properly marked, cited, and acknowledged content, all opinions, text, charts, data, etc., in the submission materials are original research results of myself or my team and do not include any published research results of others.

B.3 Statement by the Owner of Reference Implementation and Optimized Implementation

(Please choose one of the following two scenarios.)

☒ I, full name (postal address), am the owner of the reference implementation and optimized implementation of the algorithm (algorithm name);

☐ I, full name (postal address), am the authorized representative of full name of owner (postal address of owner), the owner of the reference implementation and optimized implementation of the algorithm (algorithm name),

and agree to authorize the algorithm solicitors, public reviewers, and other relevant parties to use these implementations free of charge for the purpose of algorithm evaluation, and undertake that if the algorithm (algorithm name) is selected into the standard, I will impose no restrictions on the worldwide public availability and free use of these implementations.
